

# Mass Vaccination Protocol

## MASS VACCINATION PROTOCOL (SAMPLE)

Farm Name: \_\_\_\_\_ PID #: \_\_\_\_\_

**Farm owner/manager to review and accept the vaccination protocol with a site supervisor appointed by CFIA or provincial Ministry of Agriculture, setting out all requirements including:**

- Species/class to be vaccinated
- Method
- Dosage
- Record keeping requirements
- Booster requirements
- End use
- Oversight
- Other control factors

**All personnel acknowledge their acceptance of regulatory oversight whether provided by CFIA or provincial Ministry of Agriculture**

**All personnel agree to apply protocol as directed by CFIA or provincial Ministry of Agriculture site supervisor**

**Farm staff will:**

- Record receipt of vaccine doses and ensure oversight of vaccine as directed.
- Vaccinate all animals, as set out in the vaccination protocol and directed by the site supervisor.
- Record individual animal identification of each vaccinee, at time of vaccination, together with date and place and members of vaccination crew and vaccination oversight personnel.
- Identify vaccinees, as required by regulatory authority. This may be a temporary or permanent identifier (e.g., ear tag or brand).
- Record unused vaccine doses and return to regulatory authority, if required.
- Provide CFIA or provincial Ministry of Agriculture site supervisor with record of animal identification for all animals vaccinated.
- Apply second or booster vaccination if directed, using similar protocol, in the time frame required.
